summary HYDRAULIC

Every day **our filters and our filter elements efficiently satisfy the filtration requirements** of countless applications all over the world.

Wherever a hydraulic or lubrication system is operating, on fixed or mobile applications, **FILTREC filters and filter elements ensure the correct oil cleanliness to maintain the system's efficiency and reliability.**

Our continuously evolving and expanding range of filter assemblies covers **suction, pressure and return applications**, to effectively solve the contamination control requirements of hydraulic systems.

The performances of our **filter elements are validated by vigorous laboratory tests** performed according to the most recent ISO specifications.
